WORK HISTORY

Independent Web Developer

04/2023 - present

Self employed, Düsseldorf

- Developing dynamic and responsive web applications using modern FullStack technologies.
- Balancing technical expertise with a creative touch to deliver visually appealing and functional user interfaces.
- Elevating brand identity through meticulously crafted websites, integrating dynamic animations seamlessly into the user interface for an engaging and memorable user experience that leaves a lasting brand impression.
- Assisting clients in transitioning their existing websites and applications to contemporary implementations, seamlessly integrating modern serverless hosting solutions for enhanced efficiency and performance.

Lead Software Developer

05/2021 - 03/2023

Kesselheld GmbH, Düsseldorf

- Responsible for the conception and development of software solutions based on Typescript, React, NodeJS, PostgreSQL, Java, APEX
- In charge of updating web presence based on a modern Next.js / React Stack to improve performance, maintainability, and seo visibility
- Support in the implementation and administration of Salesforce as well as implementation of extensions based on LWC, LWR, Apex and Visualforce
- Support in the design and responsibility of the implementation of business processes in Salesforce using APEX and Flow Builder
- Connection of a Salesforce system to a SAP PI PO partner network and provision of various REST APIs
- Introduction of agile project management based on SCRUM.
- Administration and maintenance of GIT repositories and Linux server
- Code reviews and guidance of interns and working students
- Development and implementation of internal trainings and workshops (e.g. on Git, test frameworks, agile project management)

Junior Software Developer

08/2018 - 05/2021

Kesselheld GmbH, Düsseldorf

- Fullstack development in the languages: Typescript / NodeJS / VueJS, PHP, Java, APEX
- Integration, administration and maintenance of MySQL databases
- Administration and maintenance of Git repositories
- Code reviews and collaboration in release and development management
- Independent rollouts of hotfixes and minor releases
- Participation in and partial leadership of Scrum meetings
- Independent coordination and implementation of development subprojects and interdisciplinary projects
- Support and guidance of interns and working students
  First and second level support
